

9 March 2006

HUTCHISON TELECOM TURNOVER INCREASES 64.1% IN 2005

GLOBAL MOBILE CUSTOMER BASE NOW EXCEEDS 20 MILLION

Key Highlights

- Mobile customer base continues to grow rapidly and now exceeds 20 million
- 3G customer base in Hong Kong now surpasses 500,000
- Rapid growth in India drives 39% increase in Group's mobile customer base
- Turnover increases 64.1% to HK\$24.4 billion
- Profit from operating activities over HK\$2.0 billion
- Profit before tax increases 32.8% to HK\$636 million

Financial Highlights:

| | 2005 HK\$'million | 2004 HK\$'million |
|--|----------------------------|--------------------------|
| | | (Restated) |
| Turnover | 24,356 | 14,845 |
| Operating profit/(loss) before disposal of investments and others | 2,083 | (144) |
| Profit before tax | 636 | 479 |
| (Loss) / profit for the year | (150) | 240 |
| Loss attributable to equity holders of the Company: | (768) | (30) |
| (Loss) / earnings per share attributable to the equity holders of the Company from: - Continuing operations - Discontinued operations | HK\$ (0.09) HK\$ (0.08) | HK\$ 0.01 HK\$ (0.01) |

Hutchison Telecommunications International Limited ("Hutchison Telecom" or "the Company" or "the Group"; SEHK: 2332; NYSE: HTX) today announced its financial results for the full year ended 31 December 2005, which have been reported under the revised Hong Kong Financial Reporting Standards and Hong Kong Accounting Standards. The Company also reported its fourth quarter key performance indicators.

The Group reported a 64.1% increase in turnover in 2005 to HK\$24.4 billion with most operations reporting turnover growth despite facing increased competition. The upsurge in turnover was driven by growth in the Group's mobile customer base, which increased 39% to 16.9 million at the end of 2005 with particularly strong growth in India. The number of mobile customers in India continues to grow rapidly into the first quarter of 2006 and the Group's global mobile customer base now exceeds 20 million.

In 2005 the Group for the first time consolidated its Israeli business, Partner Communications Company Limited ("Partner"), adding HK\$6.6 billion of turnover. Excluding this one off event the underlying turnover growth was 19.5%.

Earnings before Interest, Tax, Depreciation and Amortisation ("EBITDA") increased to HK\$6.5 billion compared with HK\$3 billion in the previous year following a strong performance in India, a welcome recovery in the mobile operations in Hong Kong and a reduced loss in Thailand.

The Group saw a strong improvement in operating profits of the underlying businesses (operating profit before disposal of investments and others) which moved from a loss of HK\$144 million in 2004 to a profit of HK\$2,083 million in 2005. After accounting for the profits on disposal of investments and others as well as share of results of associated companies, the Group's operating profit increased to HK\$2,240 million compared with operating profit of HK\$1,494 million in 2004, which had included a one-off gain of HK\$1,300 million.

Profit before tax increased 32.8% to HK\$636 million, a strong improvement on 2004 reflecting the generally improved performance across all the businesses. After tax and losses from discontinued operations, which principally relate to the sale of the Paraguay operations, the loss for the year was HK\$150 million.

The increases in depreciation and amortisation, net interest and tax reflect the first time consolidation of Partner, which was equity accounted for in 2004, as well as the increased scale of the Group's business.

The Group recorded a loss to equity holders of the Company of HK\$768 million represented by loss from discontinued operations of HK\$352 million and loss from continuing operations of HK\$416 million or 9 Hong Kong cents per share.

Dennis Lui, Chief Executive Officer of Hutchison Telecom, said: "We are delighted to report such strong performance. In 2005, we delivered over HK\$2 billion in profits on continuing operating activities, against a small loss in the previous year."

"2005 was an important year for Hutchison Telecom in other ways," Mr Lui said. "We strengthened our position in the high growth markets of India, Indonesia and Vietnam through acquisitions and investment. We plan to invest substantially in 2006 to further strengthen our position as one of the leading operators in emerging growth markets," Lui said.

The Company did not declare any dividends for the year ended 31 December 2005.

Operations Review

India

- Customer base increased 59.4% to 11.4 million
- Turnover increased 40.9% to HK\$10.0 billion
- EBITDA increased 47.1% to HK\$3,237 million

Hutchison Essar is one of the leading operators in India and in 2005 it made progress both organically

and through acquisition to position its business to become one of the major telecommunications companies in the country.

The customer base grew by 4.3 million new customers in 2005, an increase of 59.4% in the full year and 17.6% in the fourth quarter. This growth has largely been in the prepaid segment, driven by accelerated investment in coverage together with the introduction of new tariff plans and realignment of existing plans.

Turnover increased 40.9% to HK\$10.0 billion which mirrored the strong growth in the customer base. EBITDA increased 47.1% to HK\$3,237 million with improved margins in Andhra Pradesh, Chennai, Haryana and Rajasthan.

The Group intends to invest between HK\$9 billion and HK\$10 billion in India in 2006 to double the size of the network in anticipation of continued growth it expects to see in 2006.

In 2005, Hutchison Essar entered into agreements to acquire the operations of BPL Mobile Celluar Limited, BPL Mobile Communications Limited and Essar Spacetel Limited. Part of these transactions was completed in January 2006 expanding its coverage from 13 to 16 circles, which now includes all the "metros" and A circles. When completed, these acquisitions will lead to a nationwide footprint.

Indonesia and Vietnam

In 2005, the Group made a strategic investment to enter the Indonesian mobile market, which it views as a key market for growth in Asia. The Group commenced nationwide network rollout in 2005 and expects to launch commercial services in the second half of 2006. With the introduction of innovative and cost-effective services, the Group is confident that Indonesia will be one of its principal growth businesses in the years to come.

In Vietnam the Group is building a nationwide mobile telecommunications network. Vietnam offers a unique opportunity to bring Hutchison Telecom's brand of mobile services to a market with significant growth potential. With its supplier, Nortel, the Group is currently building a nationwide CDMA network and expects to launch commercial service sometime in the second half of 2006.

Indonesia and Vietnam will provide the Group with the opportunity to deliver strong growth in future operations and it expects to invest HK\$2 billion to HK\$3 billion in these markets over the next twelve months.

Hong Kong

- Combined fixed and mobile turnover of HK\$6.0 billion
- Combined EBITDA of HK\$1,465 million

The Group made great strides during the year to streamline and integrate its fixed-line and mobile business in Hong Kong. Financial performance improved amid the increasingly aggressive environment in both the fixed-line and mobile markets. The benefits of these measures were reflected in an improvement in the financial performance and organisational efficiency of the businesses.

Hong Kong and Macau Mobile

- Customer base at the end of 2005 was 1.97 million
- 3G customer base has now surpassed 500,000
- Turnover increased 3.3% to HK\$3,837 million
- EBITDA more than doubled to HK\$769 million

Hutchison Telecom Hong Kong is the leading 3G operator and one of the largest mobile operators in Hong Kong. In 2005, it continued its push to bring 3G services to Hong Kong and now has a 3G customer base in excess of 500,000. 3G customers continue to deliver a premium revenue stream, helping to grow our revenues in the face of market penetration level in excess of 100%.

Despite intense competition, combined turnover for the Hong Kong and Macau mobile operations increased 3.3 % to HK\$3.8 billion, driven by the growing 3G customer base and higher average revenue per user associated with 3G services. EBITDA was HK\$769 million, a welcome recovery from HK\$362

million in 2004 as the benefits of cost initiatives started to show and due to the absence of one-off charges. The EBITDA margin improved to 20.0% in 2005 from 9.7% in 2004.

Hong Kong Fixed

- Turnover increased 17.9% to HK\$2.2 billion
- EBITDA increase 3.9% to HK\$696 million

Turnover for the fixed-line telecommunications business totalled HK\$2.2 billion, an increase of 17.9% over 2004, with strong growth in international direct dialling, residential broadband and the international and local data business. EBITDA increased to HK\$696 million compared with HK\$670 million in 2004 as the cost control initiatives started to achieve savings.

Israel

- Total customer base reached 2.5 million in end February 2006 with over 118,000 3G customers
- Turnover contribution for the nine months to 31 December 2005 was HK\$6.6 billion

The 3G network launched towards the end of 2004 had over 118,000 customers at the end of February 2006. The 3G network roll out has also continued and has now achieved near full population coverage.

Partner results were consolidated as a subsidiary for the first time for the period from April to December 2005, following a buy back of shares by Partner. The turnover contribution from Partner for the 9 months was HK\$6.6 billion with EBITDA of HK\$1,981 million. In addition, the Group reported HK\$88 million profit under the equity accounting method for the three months ended 31 March 2005.

Thailand

- Customer base increased 19% to 732,000
- Turnover of HK\$1 billion

By taking decisive action to control costs, the operations in Thailand moved closer to EBITDA breakeven, becoming EBITDA positive on a monthly basis by the end of the year. Despite an extremely difficult operating environment, the Group was able to overcome the challenges and is confident that the business is now on a strong base.

Turnover was HK\$1.0 billion, whilst LBITDA improved from HK\$233 million in 2004 to HK\$15 million in 2005. The Group launched a number of initiatives in 2005, including restructuring the organisation and entering into a managed services agreement for both the network maintenance and IT operations, which resulted in a positive EBITDA in the last quarter of the year and is expected to have a positive impact in 2006.

Outlook

The coming year is expected to be a year of substantial investment for the Group. We anticipate investing in the order of HK\$13.5 billion to HK\$14.5 billion in capital expenditure to expand our operations. Much of the investment will be in India where we have earmarked between HK\$9 billion and HK\$10 billion to double the size of the network. This will be used not only to expand the existing operations but will also be invested in the operations acquired through BPL. We plan to invest in operations upon completion of the licence applications in the remaining areas where we presently do not operate and we will add more backbone capacity.

We plan to invest in aggregate HK\$2.0 billion to HK\$3.0 billion in Indonesia and Vietnam during 2006. The balance of the investment is planned for the 3G network in Israel and maintenance expenditure across the remainder of our businesses.

Our depreciation and amortisation charge will be higher in 2006 reflecting this higher level of investments.

We remain confident of double-digit mobile customer growth that will again lead to double-digit turnover growth. We expect this to support an improvement in the Group's consolidated EBITDA and EBITDA margins although it will be offset partially by the planned commencement of operations in Indonesia and Vietnam in 2006, as start up costs make an impact on the Group. Overall we consider that the Group is

well positioned in 2006 to take advantage of the opportunities in its respective markets.

- End -

About Hutchison Telecommunications International Limited

Hutchison Telecommunications International Limited ("Hutchison Telecom" or "the Group") is a leading global provider of telecommunications services. The Group currently offers mobile and fixed-line telecommunications services in Hong Kong, and operates or is rolling out mobile telecommunications services in Macau, India, Israel, Thailand, Sri Lanka, Ghana, Vietnam and Indonesia. It was the first provider of 3G mobile services in Hong Kong and Israel and operates brands including "Hutch", "3" and "orange".

Hutchison Telecom is a listed company with American depositary shares quoted on the New York Stock Exchange under the ticker "HTX" and shares listed on the Stock Exchange of Hong Kong under the stock code "2332". A member of the Hong Kong-based Hutchison Whampoa Group, Hutchison Telecom is dedicated to providing superior telecommunications services in dynamic markets. For more information, see www.htil.com.

Disclaimer:

While non-GAAP (generally accepted accounting principles) measures such as EBITDA and LBITDA are often used by companies as an indicator of operating performance, they are not expressly permitted measures under GAAP in Hong Kong and may not be comparable to similarly titled measures for other companies. Accordingly, such non-GAAP measures should not be considered as an alternative to operating income as an indicator of the operating performance of the Group or as an alternative to cash flows from operating activities as a measure of liquidity. The use of non-GAAP measures is provided solely to enhance the overall understanding of the Group's current financial performance. Additionally because the Group has historically reported certain non-GAAP results to investors, the Group considers the inclusion of non GAAP measures provides consistency in our financial reporting.

Notes:

(1) Minutes of Use ("MOU") are calculated as the total minutes carried over the network (2G total airtime usage + 3G voice and video usage, including both inbound and outbound roaming) for the period divided by the weighted average number of activated customers for the period.

(2) The data for Hong Kong and Israel relates to both 2G and 3G services.

Others currently comprise Ghana and Sri Lanka. Others in Q2 2005 and prior quarters was comprised of Ghana, Paraguay and Sri Lanka. (3)

4. Churn (% per month)

Notes:

(1) Churn % represents the average of the monthly churn rates in the period, which are calculated as the average number of disconnections (net of reconnection and internal migration between networks) for the period divided by the weighted average number of activated customers for the period The data for Hong Kong and Israel relates to both 2G and 3G services.

(2)

Others currently comprise Ghana and Sri Lanka. Others in Q2 2005 and prior quarters was comprised of Ghana, Paraguay and Sri Lanka. (3)

(4) n.m. indicates not meaningful.
